

INDY-OLGY: UNCOVERING INDY'S HISTORY THROUGH BIOARCHAEOLOGY

Engaging Today's Youth with Indy's Past through Bioarchaeology

From Civil War soldiers to the city's first citizens, Greenlawn Cemetery, a combination of multiple smaller cemeteries, was the final resting place for many notable Hoosiers. But the history is more complex than simply laying these individuals to rest.

Many Hoosiers who were buried there were relocated after industrial, commercial, and transportation development moved in, **but many were not**.

It is up to today's experts, with the help of citizens, to bring back those who have been forgotten, tell their stories, and treat them with the respect they deserve.

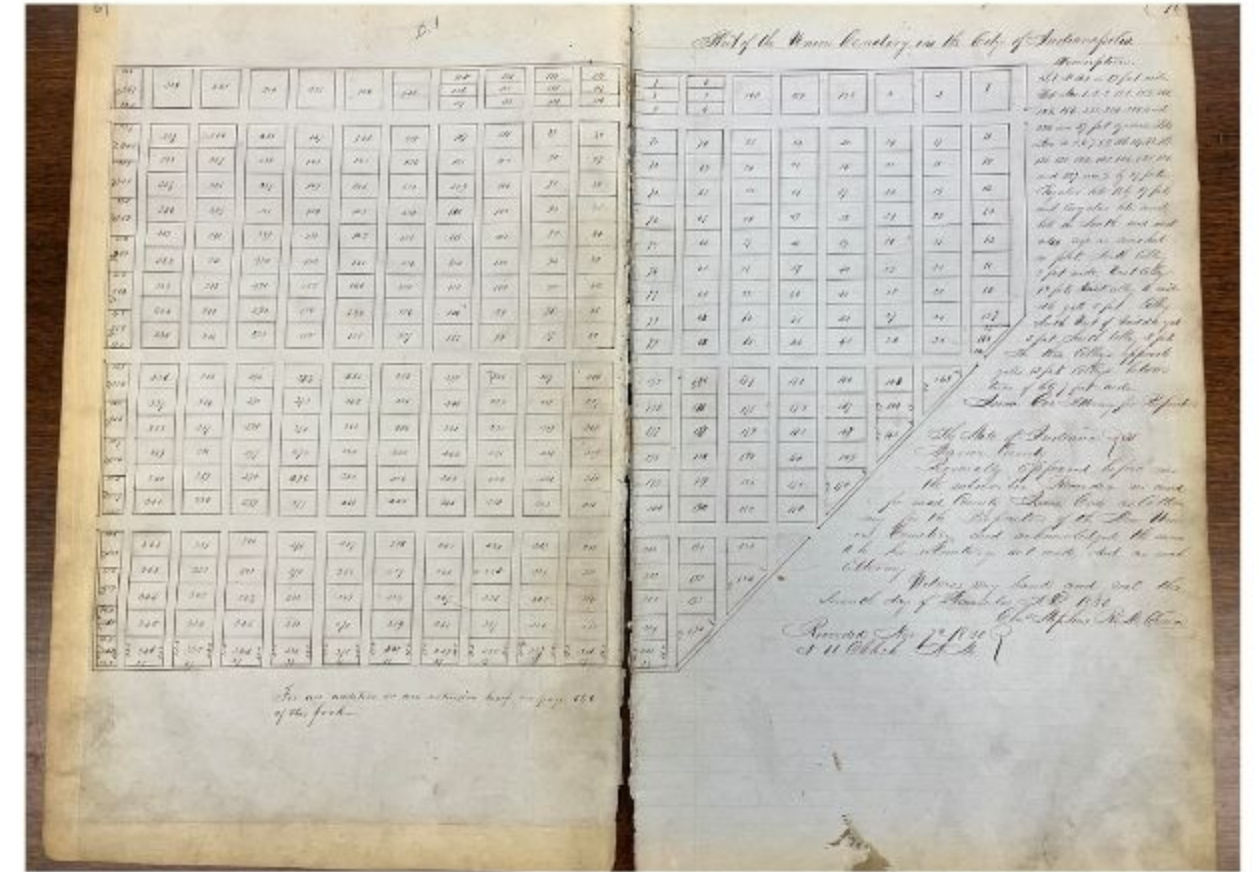

Indy-ology: Cultivating Interest in Archaeology

Indy-ology's programs and experiences aim to engage high school students from the Indy area in what it means to be an archaeologist. From time spent in the field to research in the lab, archaeology provides a glimpse into the past that can invaluablely inform the present.

Student Experience for a Career in Applied Sciences and Archaeology

Interested students can **apply to be part of this 10 week experience at: <https://bit.ly/3EB4gmJ>**. Application deadline is March 17 at 11:59pm. Students will engage in 15 hours a week of a mixture of fieldwork, lab work, and research while being guided by various experts in these fields.

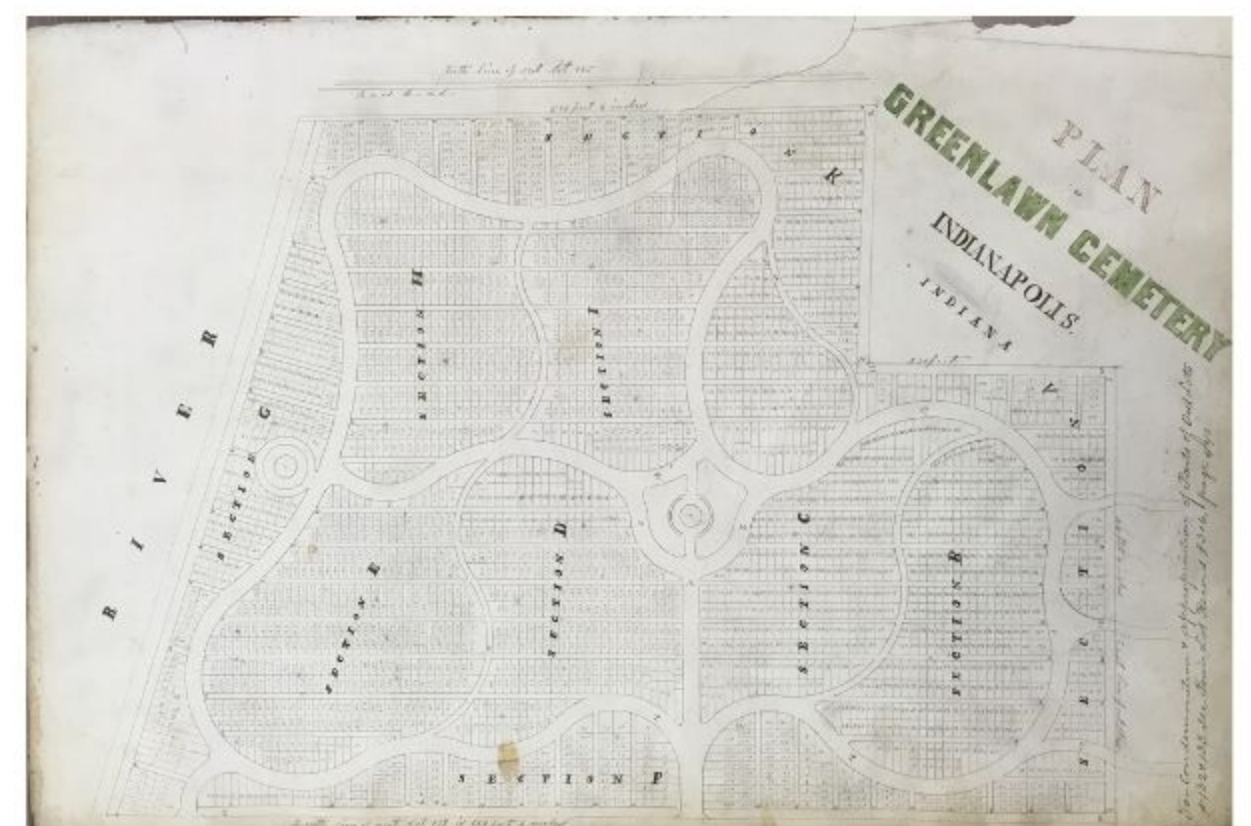

This **entry level** paid internship is designed to nurture students' interests and existing knowledge by providing a one-of-a-kind experience to empower students to pursue a career in archaeology.
